

SINTHU JEEVA

Toronto, Ontario | (416) 988-7156 | sjeevar@uwo.ca | [linkedin.com/in/sinthu-jeeva](https://www.linkedin.com/in/sinthu-jeeva) | <https://github.com/sinthuja-j>

TECHNICAL SKILLS

Programming & Tools | Python, Java, C, C++, Angular, SQL, Power BI, Tabeleau, Excel, GenAI (Claude, Copilot)
Cloud & Infrastructure | AWS (EC2, S3, RDS, EKS), Terraform (Infrastructure as Code), Kubernetes, Linux, ETLs
Database technologies | MySQL, SQL Server, PostgreSQL, Cassandra, MongoDB, Solr
Certifications | Amazon Web Services: Cerfited Cloud Practioner, Microsoft Certified: Azure AI Fundamentals

EDUCATION

Western University Bachelor of Science (Honours Specialization in Computer Science) **April 2026**

- **Culmulative GPA:** 3.9
- **Awards:** Deans Honours List, PointClickCare Scholarship (\$10,000), Horatio Alger Scholar (\$5,000), Schulich Leader
- **Extracurriculars:** Computer Science Society; Vice President of External Affairs, Basketball Association; Vice President of Marketing, Artifical Intellgience Club; Senior Director of Projects

EXPERIENCE

Canada Pension Plan Investment Board **Sep 2025 - Present**

Software Engineer - Total Fund Management Technology

- Reduced software delivery cycle time by 30% by designing and implementing DevOps automation through GitHub-based CI/CD pipelines, streamlining application and database deployments across testing and production environments.
- Engineered a Python ETL pipeline to automate ingestion and transformation of production database data into analytics-ready tables supporting Tableau dashboards, reducing manual data preparation by 40%.
- Increased product satisfaction scores by 50% by translating stakeholder feedback into prioritized Jira initiatives and driving cross-functional collaboration between business and engineering teams.

J.D. Power **May 2024 - August 2025**

Database Engineer Intern

- Directed daily DBA operations across relational and non-relational production database systems, managing deployments, performance optimization, and incident resolution to ensure high availability and operational stability.
- Led database architecture and optimization initiatives in SQL Server, automating deployments, backup scheduling, and performance tuning through SQL Server Agent, improving operational efficiency and reducing manual effort.
- Provided after-hours on-call support for production databases, stabilizing high-impact systems and maintaining uptime for client-facing analytics environments.

Connect-IT **Sep 2022 - April 2024**

Technical Coordinator

- Supported an average of 25+ customers daily, handling 50+ technical support calls and responding to 100+ support emails, delivering timely resolution of complex wired and wireless connectivity issues across a variety of devices.
- Configured and optimized routers and network infrastructure, troubleshooting advanced networking challenges and restoring downed access points to maintain reliable, high-traffic connectivity environments.
- Managed 5 technical support staff per shift, serving as the escalation point for complex networking and system issues while supporting team members in resolving advanced technical challenges.

Ministry of Public and Business Service Delivery **May 2022 - April 2023**

IT Technical Specialist, Project Assistant - Strategy, People and Planning Practice

- Developed and maintained SharePoint sites to support branch documentation management, workflow coordination, and internal communication, while contributing to user acceptance testing and quality assurance activities.
- Prepared executive briefings, reports, and project documentation for senior leadership, supporting strategic planning initiatives and large-scale operational events.
- Served as branch representative for Application Portfolio Management, participating in corporate governance forums and ensuring alignment with Enterprise Service Management and IT asset configuration standards.
